

Understanding GDPR

General Data Protection Regulation

The GDPR train is leaving the station—don't be left behind!

INNOVATIVE
DEVELOPMENT

DELIVERING RESULTS

Innovative Development LLC has over 25 years experience providing IT and business consulting services to Fortune 500 companies in many different industries. Innovative Development has offices in the USA and in the UK, providing solutions to customers worldwide.

Working on-site or off-site, fixed price or Time and Materials, we deliver the best possible results: on-target, on-time and on-budget.

At Innovative Development, we know that results matter. Our collaborative working relationships form the basis of our Innovative Solutions to your business system needs.

Innovative Development LLC, a leader in eDiscovery, Records Management, business process improvement and legal systems integration consulting services has announced the expansion of these services to include GDPR compliance consulting. Combining elements of industry best practices, ITIL, ISM, EDRM and IGRM methodologies to the implementation of GDPR principles for protection and use of personal data in international organizations. Together with real world experience of Records Management; Information Security; IT Management and Business Process Change – ID consultants are enabling organizations to identify and gain control of their data assets and manage them efficiently to reduce risk and cost.

Our customers use ID consulting services to:

- ◆ Introduce the principles, responsibilities and requirements of GDPR to the organization
- ◆ Stay current on changes to and legal interpretations of GDPR compliance
- ◆ Disseminate key definitions of GDPR in clear and concise ways
- ◆ Communicate the GDPR Principles to the organization
- ◆ Identify the lawful basis for processing for each organization
- ◆ Identify individual rights and how they relate to the organizations data processing
- ◆ Define the business processes to ensure accountability and governance
- ◆ Define appropriate security to safeguard personal data
- ◆ Define and implement the proper protocols for international transfers of personal data
- ◆ Define and implement procedures to notify individuals of personal data breaches
- ◆ Identify and document any exemptions granted by the EU to local jurisdictions
- ◆ Ensure complete definition of all processes and related to the processing of children's personal data
